

# VISIONING WORKSHOP

## Questionnaire Summary

ignite cda, Coeur d'Alene's Urban Renewal Agency, is gathering community input as it develops a Health Corridor Master Plan and conducts an economic feasibility study. The goal is to create a vibrant 175 acre development area that stimulates growth, cohesively connects services to those who need them, and creates public benefits for the community.

The study team recently conducted an online survey through ignite cda's website. We asked participants to rate what was important as we look at the Health Corridor Master Plan. 105 people responded and rated more than 20 features and issues that the master planning process will consider.

The survey results will be used to help the planning team create alternatives that "fit" with community values and desires.

This graphic illustrates the words used most frequently in responses. The size of each word shows how often it appeared in the survey answers.

Rate the importance of each in developing the Health Corridor Study Area
